

Items to Fix 1.5

- 1) Can't believe I missed this before. When the PDF is created, the ROF needs to be BEFORE the Summary and Opinion. **(waiting for response for quick fix solution)**

RECORDS REVIEW

The following information was c
Coronerâ€™s Office and River

- 2) See attached. Need to be able to use those characters. Possessives are pretty common. **- completed (awaiting testing)**

- 3) Spacing was improved on the first page of each module, but goes back to "too close" on each subsequent page. See attached. - **completed**
- 4) I have found that if I consult another doctor on another part of the case (e.g. Peer Review) -- when the doctor finishes that module (or modules), and I create the PDF in my queue, it does NOT include the modules finalized by the consulting doc. Thank you. Please use NAAG 2019-2181 and 2182. Please make sure to delete the files at your end when done as (like our other data) they are protected police data. **-completed**
- 5) It has been pointed out to me that the email notification system does not work on FART at all. **completed - (awaiting testing)**
- 6) Reordered Modules as instructed - **completed**
- 7) Added a module for consultation procedure - **completed**
- 8) Added date to specialty date as instructed from new module - **completed**

9) Got PDF generation to include all related cases to consultation – **completed**

10) Problem where cases were not closing after the Parent case was closed - **completed**
